

CCNA 200-301

CERTIFICATE NUMBER : CERT20240310525

This is to certify that :

Asep Nurdin

Has completed a 32 hours program of Cisco CCNA Training at the IDN.ID Training Center, Jakarta, on 4, 5, 6, 7 Maret 2024
The student was able to obtain proficiency :

1. Network Fundamentals

- Explain the role and function of network components
- Describe characteristics of network topology architectures
- Compare physical interface and cabling types
- Compare TCP to UDP
- Configure and verify IPv4 addressing and subnetting
- Describe the need for private IPv4 addressing
- Configure and verify IPv6 addressing and prefix
- Compare IPv6 address types
 - a) Global unicast
 - b) Unique local
 - c) Link local
 - d) Anycast
 - e) Multicast
 - f) Modified EUI 64
- Describe wireless principles
 - a) 1.11.a Nonoverlapping Wi-Fi channels
 - b) 1.11.b SSID
 - c) 1.11.c RF
 - d) 1.11.d Encryption
- Explain virtualization fundamentals (virtual machines)
- Describe switching concepts
 - a) 1.13.a MAC learning and aging
 - b) 1.13.b Frame switching
 - c) 1.13.c Frame flooding
 - d) 1.13.d MAC address table

2. Network Access

- Configure and verify VLANs (normal range) spanning multiple switches
 - a) 2.1.a Access ports (data and voice)
 - b) 2.1.b Default VLAN
 - c) 2.1.c Connectivity2.2 Configure and verify interswitch connectivity
 - a) 2.2.a Trunk ports
 - b) 2.2.b 802.1Q
 - c) 2.2.c Native VLAN
 - d) 2.3 Configure and verify Layer 2 discovery protocols (Cisco Discovery Protocol and LLDP)
 - e) 2.4 Configure and verify (Layer 2/Layer 3) EtherChannel (LACP)
 - f) 2.5 Describe the need for and basic operations of Rapid PVST+ Spanning Tree Protocol and identify basic operations
 - a) 2.5.a Root port, root bridge (primary/secondary), and other port names
 - b) 2.5.b Port states (forwarding/blocking)
 - c) 2.5.c PortFast benefits
 - g) 2.6 Compare Cisco Wireless Architectures and AP modes
 - h) 2.9 Configure the components of a wireless LAN access for client connectivity using GUI only such as WLAN creation, security settings, QoS profiles, and advanced WLAN settings

3. IP Connectivity

- 3.1 Interpret the components of routing table
 - a) 3.1.a Routing protocol code
 - b) 3.1.b Prefix
 - c) 3.1.c Network mask
 - d) 3.1.d Next hop
 - e) 3.1.e Administrative distance
 - f) 3.1.f Metric
 - g) 3.1.g Gateway of last resort
- 3.2 Determine how a router makes a forwarding decision by default
 - a) 3.2.a Longest match
 - b) 3.2.b Administrative distance
 - c) 3.2.c Routing protocol metric
- 3.3 Configure and verify IPv4 and IPv6 static routing
 - a) 3.3.a Default route
 - b) 3.3.b Network route/c 3.3.c Host route
 - c) 3.3.d Floating static
- 3.4 Configure and verify single area OSPFv2
 - a) 3.4.a Neighbor adjacencies
 - b) 3.4.b Point-to-point
 - c) 3.4.c Broadcast (DR/BDR selection)
 - d) 3.4.d Router ID
- 3.5 Describe the purpose of first hop redundancy protocol

4. IP Services

- 4.1 Configure and verify inside source NAT using static and pools
- 4.2 Configure and verify NTP operating in a client and server mode
- 4.3 Explain the role of DHCP and DNS within the network
- 4.4 Explain the function of SNMP in network operations including facilities and levels
- 4.5 Describe the use of syslog features including facilities and levels
- 4.6 Configure and verify DHCP client and relay
- 4.7 Explain the forwarding per-hop behavior (PHB) for QoS such as classification, marking, queuing, congestion, policing, shaping
- 4.8 Configure network devices for remote access using SSH
- 4.9 Describe the capabilities and function of TFTP/FTP in the network

5. Security Fundamentals

- Configure device access control using local passwords
- Describe remote access and site-to-site VPNs
- Configure and verify access control lists
- Configure Layer 2 security features (DHCP snooping, dynamic ARP inspection, and port security)
- Differentiate authentication, authorization, and accounting concepts
- Describe wireless security protocols (WPA, WPA2, and WPA3)
- Configure WLAN using WPA2 PSK using the GUI

6. Automation and Programmability

- Explain how automation impacts network management
- Compare traditional networks with controller-based networking
- Describe controller-based and software defined architectures
 - a) 6.3.a Separation of control plane and data plane
 - b) 6.3.b North-bound and south-bound APIs
 - c) Compare traditional campus device management with Cisco DNA Center enabled devicemanagement
- Recognize the capabilities of configuration management mechanisms Puppet, Chef, and Ansible
- Interpret JSON encoded data

FORTIGATE

CERTIFICATE NUMBER : CERT0450514195

This is to certify that :

Asep Nurdin

Has completed a 16 hours program of Fortigate Firewall Security (NSE 4) Training at the IDN.ID Training Center, Jakarta, on 22, 23 Januari 2025
The student was able to obtain proficiency :

Introduction

- Introduction to Fortinet UTM
- Preparing for lab Environment
- Initial Setup Fortigate
- Logging & Monitoring
- Firewall Policies
- Firewall Authentication
- SSL VPN
- Basic IPsec VPN
- Explicit Web Proxy
- Antivirus
- Web Filtering
- Application Control

Routing

- Routing
- Virtual Domains
- Transparent Mode
- High Availability
- Advanced IPsec VPN
- Intrusion Prevention System
- Fortinet SSO
- Certificate Operations
- Data Leak Prevention
- IPv6

23 Januari 2025

Dedi Gunawan
CEO of IDN.ID Training Center

Linux System Administrator

CERTIFICATE NUMBER : CERT0541917793

This is to certify that :

Asep Nurdin

Has completed a 32 hours program of Linux System Administrator Training at the IDN.ID Training Center, Jakarta, on 25, 26, 27, 28 Agustus 2025
The student was able to obtain proficiency :

- Apache Web Server
- Instalasi dan Konfigurasi
- Access configuration
- Secure APACHE (https)

Database

- Instalasi dan Konfigurasi
- MySQL
- PHP MyAdmin

Squid

- proxy server
- Instalasi dan konfigurasi squid.conf
- Konfigurasi browsers klien
- Squid security
- NGINX Proxy and Reverse Proxy

- Samba
- Linux-Windows Sharing
- Instalasi dan Konfigurasi
- konfigurasi SAMBA users
- smbclient, smbstatus
- Mengatur Windows filesystems
- Mengakses Windows shares

Domain Name Server

- Cara kerja DNS
- Tipe DNS Servers
- Domain Name Space
- Instalasi dan konfigurasi DNS server
- konfigurasi named.conf dan databases
- DNS resource record formats
- Pengujian DNS Server
- Setting DNS Client

- Backup and recovery
- file system backup
- ile backups
- tipe dump levels
- backup harian, mingguan, bulanan
- strategi backup

Automation

- Cron dan Anacron
- At dan Batch
- Instalasi dan konfigurasi
- konfigurasi jobs

- File transfer protocol
- FTP server dan klien
- anonymous users
- download dan upload permissions
- FTP user access
- FTP security
- Packet filtering
- iptables
- chains
- rule targets
- connection tracking
- Network address translation (NAT)

- Zimbra Mail Server
- Arsitektur Zimbra
- Instalasi dan konfigurasi Zimbra Collaboration
- Zimbra Collaboration Suite
- Zimbra Admin Console
- Zimbra Collaboration System
- Backup & Restore

28 Agustus 2025

CEO of IDN.ID Training Center

VMWARE VSPHERE

CERTIFICATE NUMBER : CERT0582919041

This is to certify that :

Asep Nurdin

Has completed a 32 hours program of VMWARE Training at the IDN.ID Training Center, Jakarta, on 24, 25, 26, 27 November 2025
The student was able to obtain proficiency :

Implementasi Vsphere Host

- Lab 1. Install ESXI Sever
- Lab 2. Manegement Configure Server ESXI

Vsphere Client

- Lab 3. Management Storage Vsphere
- Lab 4. Install OS di Vsphere Host
- Lab 5. Deploy dan Eksport OVF
- Lab 6. Instalasi menggunakan CD/DVD ROM Client
- Lab 7. install Vmtools Windows
- Lab 8. install Vmtools Linux

Menajemen Vsphere Configuration

- Lab 9. Menambahkan Licensed Vspher host
- Lab 10. Automatic Start UP Vspher host
- Lab 11. Setting SSH Vspher host
- Lab 12. Virtual Switch
- Lab 13. Konfigurasi Vsphere Networking
- Lab 14. User Authentifikasi Manager

Implementasi Vsphere Power CLI

- Lab 15. Install Power Cli
- Lab 16. Conect to Vsphere Host with Power CLI
- Lab 17. Menjalankan VM dengan Power CLI
- Lab 18. Mematikan VM dengan Power CLI
- Lab 19. Restart VM dengan Power CLI

Implementasi Vcenter

- Lab 20. Deploying Vcenter
- Lab 21. Login Vcenter web Client
- Lab 21. Instalasi Vsphere Plugin
- Lab 22. Login Vcenter menggunakan Vsphere
- Lab 23. User Authentification
- Lab 24. Adding Vsphere Host to Vcenter
- Lab 25. Memisahkan file kedalam folder di menu VMS and Template
- Lab 26. Menggunakan Schedule Task Vcenter
- Lab 27. Menggunakan Alarm pada Vcenter

Menjemen Vcenter

- Lab 28. Backup dan Restore
- Lab 29. Snapshoot Backup System
- Lab 30. Konfigurasi PV (Phisical to Virtual)
- Lab 31. Backup Data VM Menggunakan SSH
- Lab 32. Backup Melalui Data Store
- Lab 33. Vmware Data Recovery dan Data Protection

Vmware Storage

- Lab 34. Install FreeNas
- Lab 35. Konfigurasi FreeNAS NFS Share
- Lab 36. Konfigurasi FreeNAS ISCSI Share
- Lab 37. Konfigurasi ESXI dengan NFS dan ISCSI
- Vmware Vsphere Migration or Vmotion
- Lab 38. Konfigurasi Vmware Vsphere Vmotion
- Lab 39. Penggunaan Vmware Vsphere Vmotion

Vmware Vsphere Cluster

- Lab 40. Vsphere OverView
- Lab 41. Vsphere Cluster
- Lab 42. Menambahkan Host di Cluster
- Lab 43. Aktivasi HA (haight Availability)
- Lab 44. Destrubuted Resource Schuldre(DRS)

27 November 2025
